EDUCATION

University of Washington   **Seattle, WA**
Bachelor of Science, Applied Physics   *June 2018*

SKILLS

Programming: HTML, CSS, JavaScript, Java, MATLAB, Mathematica,
jQuery, jQueryUI, Moment.js, Bootstrap, GitHub
Node.js, Express.js, MySQL, Sequelize, Handlebars.js

Languages: Spanish

PROJECTS

Vědomý
https://gushihiro.github.io/Project-Face-Space/
HTML, CSS, JavaScript

Provides a space for self-reflection and health suggestions. Record thoughts and daily health habits, steady internal pace with box-breathing activity, and receive daily ideas for food recipes, yoga poses, and sleep advice.

Pantrimonium
https://pantrimonium.herokuapp.com/
Express.js, Sequelize, Handlebars.js

An inventory application for kitchen food items. The user can manage quantities and set a threshold value to define when items are running low. The application will create a shopping list for items that run low or items that have past their expiration date.

E-Commerce Back End
https://github.com/comatosino/e-commerce-back-end
Express.js, Sequelize, MySQL

Back-end application that performs RESTful CRUD operations to create, read, update, and delete products, categories, and tags. This Express.js API uses Sequelize to interact with a MySQL database.
